Aluminum

CASEMENT WINDOWS

and ALUMINUM SCREENS...

* 7 Superior Features

1. All frame corners electrically flash-welded, electronically controlled, for greater strength and uniformity.
2. All casement sections are highly tempered aluminum alloy extrusions—all sash sections are tubular for greater strength.
3. All casements accommodate either standard glass or insulated double pane glass.
4. Factory cleaned and polished casements reduce installation costs.
5. Casements, screen mesh and hardware do not require painting. Low maintenance cost.
6. Over 100 sizes and styles—all available with aluminum screen mesh and frames, if desired.
7. Improved modern appearance; light and ventilation areas increased by availability of vent frames up to 24" wide.

SCALE OF DETAILS 1/2 FULL SIZE

MULTIPLE WINDOWS. When two or more standard units, shown above, are used for a multiple window opening, add $\frac{1}{8}$ " for each mullion to the total of window widths of the units selected, for the over-all size.

A.B.C. Steel Equipment Co., Inc.

New York and Tampa

A FEW EXAMPLES OF ADDITIONAL WINDOW TREATMENTS

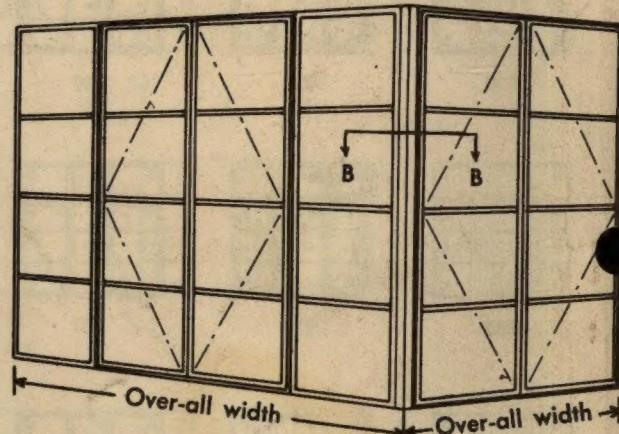

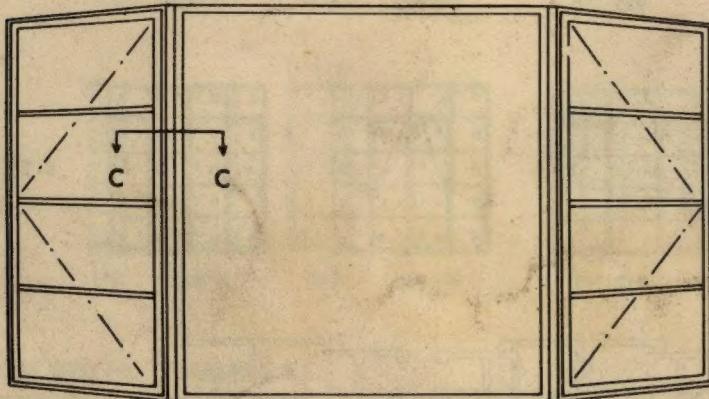

PICTURE OR PANORAMA

WINDOWS. The great popular demand for picture or panorama windows can be satisfied easily with A.B.C. stock size casements and available fixed light center frames.

When ordering, specify (1) over-all width of window required and (2) style number of stock ventilators desired for each side of center window panel. Indicate left or right-hand if single vent sides are chosen. See note on page 4.

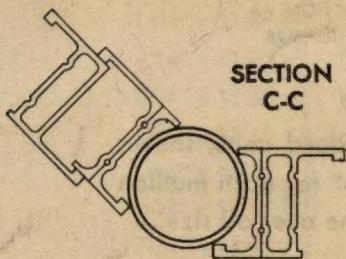

CORNER WINDOWS. Corner windows afford a sure way to maximum light and ventilation. A.B.C. casement windows from stock can be combined to meet any requirement, by the use of a square tubular aluminum mullion of proper height.

When ordering specify the style number of the units you will use in the corner window, enabling us to send the mullion needed. Also specify the over-all width of each side.

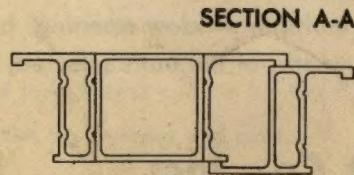

BAY WINDOWS. We would be pleased to furnish layout and recommendation for a square or splayed bay window which can be constructed from stock size A.B.C. casements, fixed light frames and round tubular aluminum mullions. Send us layout and description of your requirements.

NOTE—ALL A.B.C. MULLIONS ARE ALUMINUM
EXTRUSIONS, FABRICATED, POLISHED, READY FOR
INSTALLATION—NON LOAD BEARING
